Over view

You will need buildings for attack power such as Forgotten Temple; Tourney Ground; Yuki; Baroque/Osbian Tower

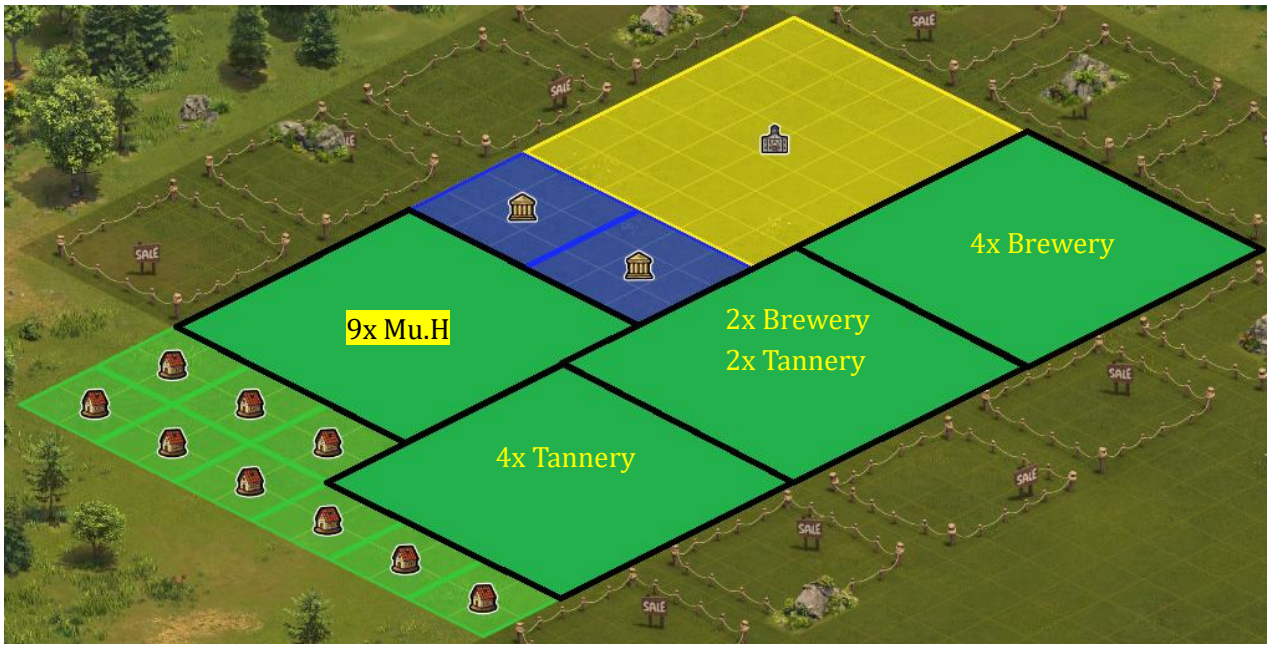

If you have some Ascended, such as Snowdrop Garden, it's realy good

Layout

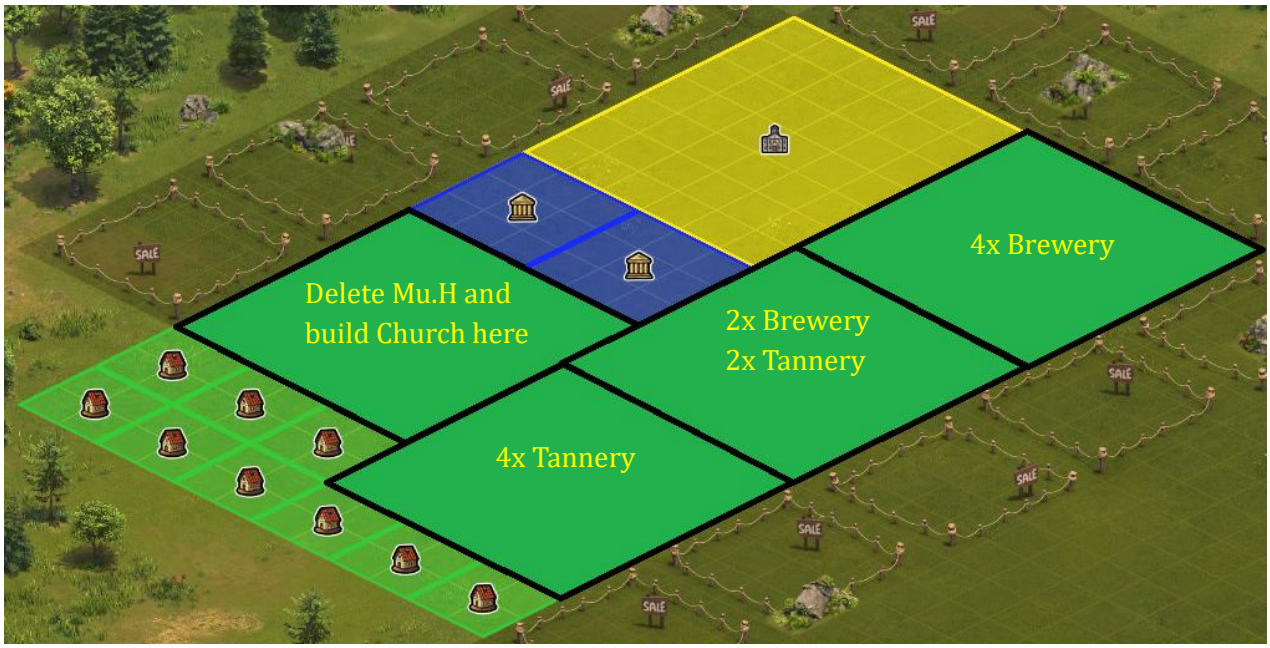

Each large square measures 6x6, allowing you to build 9 2x2 houses (Estate/Multistorey House, etc.) or 4 3x3 building (church/doctor/tannery/shoe maker/brewing).

First attempt:
- Open 3 shards to create a 3x5 tile; break rocks if necessary.
- 7x Estate House, 1x Mansion, 1x Multistorey House
- 2x Church
- 6x Tannery, 6x Brewery
- 9x Multistorey House (Mu.H) (we will delete it at second attempt)
- Donate goods, fight at the easy nodes.

Second attempt:
- Delete 4x (Mu.H) to build 1 church THEN Delete 2x (Mu.H) to build 1 church THEN Delete 2x (Mu.H) to build 1 church THEN Delete 1x (Mu.H) to build 1 church (total: delete 9x (Mu.H) to build 4x churches)
(You must wait 5 seconds for the Church to be built before deleting the next Mu.H.)
- Harvest everything for 400 alloy + sup coins
- Delete 4x churches;
- Build a Cataput and buy 30 soldiers to fight, then delete it
- Build 9x (Mu.H)
- Delete 2 Tannery, build 2 Shoemaker
- Donate goods or coin/sup; fight at the easy nodes.

Third attempt:
- Delete 4x (Mu.H) to build 1 church THEN Delete 2x (Mu.H) to build 1 church THEN Delete 2x (Mu.H) to build 1 church THEN Delete 1x (Mu.H) to build 1 church (total: delete 9x (Mu.H) to build 4x churches)
(You must wait 5 seconds for the Church to be built before deleting the next Mu.H.)
- Harvest everything for 596 alloy + sup coins
- Delete 2 Tannery, build 2 Shoemaker
- Donate goods or coin/sup; fight at the easy nodes.

Fourth attempt:
- Harvest everything for 792 alloy + sup coins
- Delete 5x churches; build 1 Doctor, 9x (Mu.H)
- Delete 2 Tannery, build 2 Shoemaker
- Donate goods or coin/sup; fight at the easy nodes.

Fifth attempt:
- Delete 4x (Mu.H) to build 1 church THEN Delete 2x (Mu.H)
(You must wait 5 seconds for the Church to be built before deleting the next Mu.H.)
- Harvest everything for 1000 alloy + sup coins
- Build 1 ropery and buy rope to buy 3 expansion (wait 1h or using 25 shard to finish right away)
- Build 4 Frame house, 3 church and all (Mu.H)
- Donate goods or coin/sup; fight at the easy nodes.

sixth attempt:
- Delete 4x (Mu.H) to build 1 church
(You must wait 5 seconds for the Church to be built)
- Harvest everything for 1400 alloy + sup coins
- Build rope to buy 1 expansion then delete ropery
- Build 2 Frame houses and a canon camp (may not enough coin sup if donate too much before).
Solutions:
1. DO NOT buy the 4th expansion by rope, build a canon camp and buy the 4th expansion next time.
2. Leave the recently purchased 4th expansion empty, build the canon camp next time (use 50 shards to complete it immediately or wait until the next time).
- Donate goods or coin/sup; fight at the easy nodes.

7th attempt:
- Delete MuH and Es.H until you have 150% Euphoria to havert
- with 1700 alloy, coin, sup → build 1 Doctor and 1 Clapboard house and 1 group of tree (or Ruin tower). If you need strength, you can build some decorations (Group of tree or Ruin tower) instead of Clapboard House right away.
- Buy Canon to fight

The next steps will require you to adjust to your needs.

I usually build up to a total of 2 Bakeries and 2 Clapboard Houses.

Meanwhile, I can fight on normal and hard nodes (without fighting bosses).

Then, I will harvest until I have 13,000 alloys, 6 million coins, and 5 million sup.
I will buy about 200-300 canons, then delete all existing buildings, leaving only the Doctor, and build a total of 18 Doctors and 20 Group of Trees.

After that, it's just fighting.

Good luck and fun!
